

Human: Suppose you are a navigation app like google maps and you have been given the following historical paths:

Context #1

Below are three paths that start from Rua da Prelada to reach Rua de Afonso Lopes Vieira:

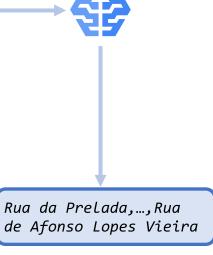

- * The fastest path which crosses: Rua da Prelada,..., Rua do Professor Damião Peres,
- * Then the shortest path which goes through: Rua da Prelada,..., Rua de Eugénio de Castro
- * And the last but not least is the most used path that crosses: Rua da Prelada,..., Rua de Azevedo Coutinho, ...

Context #2

Context #k

Use that and your knowledge about the road network of the city of Porto to generate a scenic route from from Rua da Prelada to Rua de Afonso Lopes Vieira that avoids highways and passes by a coffee shop. Your answer should ONLY include the names of the roads traversed by this path and the names must be separated by a comma.
